

Meeting friday 25-11-2016

Agenda

- Create readme according to the rubric
- Add photos and names to the readme
- GUI demo
- Create first version of UML
- Continuous Integration explanation
- Project setup
- Agreements within the group

Next time

- Nils, Alex and Axel will create the first version of the design
- Yin will implement the classes defined in the UML. Stephan will help her.
- Matthijs will create the first version of the JSON database
- Stephan will create a PR to add the goal of the project to the readme along with some other things that belong inside a readme.
- FOR EVERYBODY:
 - Please check again the contribute wiki, so that we are all on the same page
 - Also please check the UML for any mistakes, so we can discuss them next time.
